

## UNSTOP DB DETAILS

Db used- mysql

Tables- seat table

The image shows a screenshot of a database interface, likely MySQL Workbench, displaying the structure of a table named 'seat'. The table is located in a database named 'btd8r8pjtrwuxoomt1ml'. The table structure is as follows:

Column Name	Data Type
id	int
row_num	int
col_num	int
booked	tinyint(1)

View- v\_row

Sql -

```
CREATE VIEW v_row as SELECT row_num, SUM(CASE WHEN booked = false THEN 1  
ELSE 0 END) AS vacant_seats FROM seats_temp GROUP BY row_num ORDER BY  
row_num
```
